1. The following is an examiner's statement of reasons for allowance: EP'314, as modified, failed to teach or suggest the limitation of the performance characteristics representing dependencies of brake-application energy levels for the tractor and the brake-application energy level for the trailer vehicle on at least one of the brake-application energy reference value and the axle load ratio. Examiner also notes that although a reference value is calculated in EP'314, it is not a set brake-application energy value specifically calculated as required by the claim language set forth in the last 8 lines of the claim. Examiner also notes that the drawing and specification objections have been withdrawn in light of the amendments filed 6/1/06. Accordingly, claims 1, 25, 28, and 29 are allowed. The remaining claims are allowed due to their dependency from the allowable independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
